

Dear Coalition Members,

Thank you to all those who attended this week's December CCCA meeting! Missed the meeting? **Watch the recording [here](#), using the password 997.u7by** or read below for highlights!

We were fortunate to hear from DEEP Commissioner Katie Dykes and leaders in the environment committee, House co-chair Rep. Parker and vice chair Rep. Bumgardner. Each speaker gave insights on pathways for implementation during 2026, upcoming legislation, the need to defend existing climate policies.

Lastly, steering committee members from Conservation Law Foundation, Inter-religious Eco Justice Network, and Mitchell Environmental Health Associates presented on the three buckets of legislative priorities for 2026.

## AFFORDABLE, RENEWABLE ENERGY FUTURE NOW

# ACCELERATE CLEAN ENERGY DEVELOPMENT

- Create refundable renewable energy tax credit incentives for families and businesses
- Expand community solar programs
- Fund the thermal energy network pilot program

## AFFORDABLE ENERGY

- Continue investment in energy efficiency through protecting the systems benefits charge
- Increase weatherization by funding the Residential Energy Preparations Services program to decrease barriers to entry

ACT NOW TO PROTECT COMMUNITIES

- Create protections from extreme heat for vulnerable communities
- Deprioritize incinerators to improve air quality and health of residents
- Repair damage from federal termination of environmental funding
